## About This Game

**In Stick Spartans up to four Spartans fight by poking each other with sticks to claim the golden helmet.**

Stick Spartans brings fast paced family friendly action to the living room with simplistic and easy to learn controls. Each player controls a Spartan which can run around this confined arena in teams or solo to eliminate the opposing players and rein victorious claiming the golden helmet.

In this arena players poke each other to steal health with their wooden sticks, health is indicated by the bands around their stick. When you run out of health you are eliminated until only one Spartan remains. You can Jump to dodge an attacking Spartan's Stick.

The environment has dust clouds created by player movement, In a large battle the dust cloud can cover up some of the combat so keep track of your player.

Match settings can be adjusted before play like: Stick length, Dual wielding, and movement speed.

## Features:

- Easy to learn controls
- Full controller support

- 
- Integrated UI elements
  - Low poly simplistic art style
  - A selection of game modes
  - Dynamic rotating camera
  - 1v1 and 2v2 gamemodes
  - Single-player against AI
  - Adjustable match settings
  - Capture the flag
  - King of the Hill
  - Insta-Kill Mode

Game modes include: Player vs Player and Player vs AI in both 1v1 or 2v2 modes.

This feels like that hentai game I first played when I was a preteen, still better than 3d girls

No, I don't have a p\*enis. Yes, I am a virgin.

edit: No, I didn't get paid to buy this game. I bought it as a joke. I do like hentai games but only the japanese ones.

Do you have a VR and want to waste a few bucks? Buy it.

The 12 years old me would still fap to this.. Ended my first three hours on this Chef/Restaurant simulator and i'm gonna write a quick review.

As a Early Access, the game runs quite smoothly. The core is there, complete. You can manage the kitchen, the staff, the recipes, the restaurant, how to attract new kind of customers. The menù recognize the kind of recipes you're putting in it, showing you the malus/bonus on having, for instance, a vegetarian only kind of restaurant.

Every member of the stuff has his own kind of bonus (or malus).

Is it perfect? Nope. It's an Early access game, it does have some bug around and need a bunch of new feature/reworks on the UI (i'm talking to you, POLICIES. GOT 6K IN DEBT!)

Give it a shot and work with the software house on making him a better game.. Not bad, just bland. I died for no apparent reason on the 3rd level and had to start over at the 1st... I found that to be a good stopping point.. I was just curious to play this hilariously themed game, but after downloading it said something about a missing dll file when I try to boot it.

So it's not even playable... please fix so I can give this game a proper review.

I have to vote "no" for now since the game is not even playable, but that may change after I try it...if it's fixed.. This is the coolest game evr!!!! Totaly worth it and it will be amazing when its done! It has lots of potential, but may get a little repetitive depending on how much you play it, but I say get it now while its cheap!!!!!!!. For 5.00. Worth it if you plan on playing for a few days even. Fun hack and slash game.. CS:GO Player Profiles

Thoroughly enjoyable!

Shortly after picking up this game I was reminded of two things; firstly how much I enjoy this type of game and secondly how much I now suck at this type of game (hey, it has been a long time since Starfox!!!). Arc Savior is a really well polished and fun game; luckily for me it has a nice and gentle difficulty slope that is accompanied with some detailed tutorial missions that showcase the various gameplay mechanics. The combat is frantic and you often get a sense of "AHHH!" while flying too close to an asteroid or enemy ship; at the same time the controls are excellent and navigating the complex battle grounds is a breeze (albeit a very shooty and dangerous one). This plays surprisingly well with a keyboard and mouse although it would be even more fun with a controller. This is definitely worth a look if you enjoy shooters or just fun and well made games in general! :). There's not much to this, strait forward and simple and Very Addicting. I play it a lot more then I thought I would and well worth the cost, no doubt about it... A great short free VR expereince. No reason not to check this title out.. Shepherds of the Abyss is a top notch indie game and I really enjoyed it. I had no problems with the gameplay and no issues figuring things out. Optimization and performance were stellar; It ran perfectly fine on my aging 670. Well done, I can\u2019t wait to see what these guys do next!. Wanderlust. It is a first person walking simulator game, you walk through different sceneries of backgrounds, like different biomes of places. Beautiful graphics and the music selection suited the different places that was shown. Playing this made me calm and relaxed looking at the beautiful scenes.

However this game is extremely short for \$7.99. I'd say it's overpriced for what it is, but you have you admire the work and ethic that was shown right in the screenshots and gameplay.. The RPG element aspects of this resource are viable. They contain short tidbit of what a music producer can do. If you should, maybe by Digital Audio Workstation (DAW) and just start building your own elements!

Drunk On Nectar - The Nature Simulator Sacra Terra: Angelic Night Just Beat Em Up : World of Fury How do you like it, Elon Musk? RETSNOM Invisible Apartment Differently Fast Quible Sphere everybody's sad **1.1.1 - Snap Rotation Added:** It's been so wonderful reading all the kind words and watching videos of people playing since our Steam launch! Thanks for checking out our game :)

### Patch Notes

- Snap Rotation has been added! It's mapped to the grip button/trigger. On the left controller it will rotate you 30 degrees left. The right controller will rotate you 30 degrees right.
- Glitch where music was not playing at the end of the game should be fixed
- Candles can now be picked up
- Colliders adjusted on the game console so you gamerz can now slot in those cartridges
- Modified a spoilery thing
